Summary

Full-Stack Engineer with 2+ years architecting and deploying scalable multi-tenant systems and AI-powered platforms. Built order.happytuna.com, a multi-tenant ordering system handling thousands of daily transactions. Developed Flexx.dev, a Redis-as-a-Service platform serving around 60 active users. Created Tensorify.io, a drag-and-drop AI workflow platform, reducing model deployment time from weeks to hours.

Experience

Independent Full-Stack & AI Engineer | Founder @ AlphaWolf Ventures *Self-employed, Remote*

Building AI-powered SaaS products and providing technical consulting: *Mar. 2024 – Present*

- Built Flexx.dev, a Redis-as-a-Service platform providing instant Redis hosting with automated provisioning and scaling for around 60 active users.
- Architected Tensorify.io, a drag-and-drop AI workflow platform (FastAPI, React, Docker), reducing AI model deployment time from weeks to hours.
- Developed Jomidaar, a property management platform for landlords handling tenant communication, payments, and maintenance.
- Launched Vocablet, an AI-powered vocabulary platform with agent-driven practice and Stripe billing, acquiring active learners.
- Created AXpense, a Flutter expense tracker validating monetization strategies with hundreds of downloads.

Full-Stack Engineer (Contract) *Scaledex – Dhaka, Bangladesh*

Feb. 2025 – Present

- Architected order.happytuna.com, a multi-tenant ordering system with CMS and Stripe payments, handling thousands of daily transactions.
- Developed scalable backend infrastructure for Tarea.ai (internal project) using Next.js, Socket.io and PostgreSQL, improving data processing efficiency by 25%.
- Implemented real-time order tracking and notification systems, enhancing customer experience and operational efficiency.

AI/ML Research Engineer (Remote Collaboration) *North South University*

Jul. 2024 – Jan. 2025

- Designed RAG architectures with QLoRA-tuned LLMs, improving medical retrieval accuracy by 50% for clinical decision support.
- Applied 3D CNNs and Vision Transformers in clinical decision support systems for medical image analysis.
- Deployed FastAPI-based AI services into production healthcare workflow (Dentalloop.au), impacting patient care.
- Published 4 peer-reviewed papers (2 Q1) in top-tier conferences on medical AI and NLP.

Projects

Reactor — Autonomous AI Agent | Python, LangChain, Rich

github.com/faisalahmedsifat/reactor

Claude Code for your terminal - with parallel AI agents and zero UI switching

Skills

Full-Stack Development: FastAPI, Next.js, React, Node.js, TypeScript, Tailwind CSS, Flutter, Redis, Multi-tenant SaaS, API Design, Microservices, Event-driven architecture

Programming & AI: Python, PyTorch, TensorFlow, LangChain, Transformers, NumPy, Scikit-learn, LLM, RAG, Vector Databases, Embeddings, Computer Vision

Databases & Storage: PostgreSQL, Redis, MongoDB, Pinecone, Chroma, Elasticsearch

DevOps & Cloud: Docker, Kubernetes, AWS (EC2, S3, Lambda), CI/CD (GitHub Actions), Terraform, GCP

Education

B.Sc. in Computer Science and Engineering *North South University – Dhaka, Bangladesh*

Jan. 2020 – Nov. 2023

CGPA: 3.18/4.00

Notable: International research collaboration with University of Adelaide on medical AI (published 4 papers, 2 Q1). Deployed RAG-based clinical decision support system.
